## **Identity Authentication**

### **Driver's License or State Issued Identification**

The Franchise Tax Board along with many state revenue agencies is requesting additional information for electronically filed tax returns. This is an additional effort to combat stolen-identity tax fraud and protect you and your tax refund.

We ask that you provide the requested California driver license or state-issued identification card information when completing your tax return. Providing this information is voluntary. The tax agency will not reject your return if you do not provide the requested driver license or state-issued identification information. However, providing this information may help to process your tax return more quickly.

#### **Taxpayer**
